Summary

I am a passionate Junior Software Developer with a deep skill set in HTML, CSS, JavaScript, and Figma. I enjoy designing and building web applications, driven by the desire to create exceptional user experiences. My goal is to contribute to business growth through innovative solutions. I have a genuine enthusiasm for collaborative teamwork and am eager to engage with like-minded professionals to tackle challenges and deliver impactful results.

Education

University of Nairobi **September 2023 - Present**
Project Planing and Management Bachelor's degree
I am currently pursuing a Bachelor's Degree in Project Planning and Management, with a focus on developing comprehensive skills in project management methodologies, strategic planning, and organizational leadership.

Projects

Calorie-Counter **January2024-February2024**
This is a web app built using HTML, CSS, and JavaScript. It tracks daily food intake, promoting healthier living and weight management. It's intuitive, aiding users in making informed dietary choices.
